1. Applicant's response filed on 05/29/2006 has been fully considered. The Double Patenting rejection has been withdrawn because the current application was filed before the filing date of copending Application No. 10/890,701.
2. Currently, claims 1-20 are pending.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-3, 8 and 13-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Ishikawa et al. (US 6,656,602 B1).

Ishikawa discloses a print layer formed on a gas barrier coating film, wherein the print layer is formed from a gravure ink composition comprising polyurethane resins and antistatic agents (col. 18, line 39 thru col. 19, line 15). The film that is coated with the gas barrier coating comprises a biaxially stretched polypropylene film, a biaxially stretched polyethylene terephthalate film or a biaxially stretched nylon film (col. 12, line 23), wherein these films are commonly known as transparent material.
